

THE AGENTIC ECONOMY — CHEAT SHEET

agenticeconomy.dev

TOP PROTOCOLS

Protocol	By	Type
Stripe ACP	Stripe	Payment
Google A2A	Google	Communication
Anthropic MCP	Anthropic	Communication
x402	Coinbase	Crypto Payment
Mastercard Agent Pay	Mastercard	Payment
Visa Intelligent Commerce	Visa	Payment
Olas	Valory	Crypto Autonomous
IEEE 7012	IEEE	Standard
VMP-1.0	BotNode	Verification

3 RESEARCH PAPERS

1. CRI — Commerce Readiness Index
DOI: 10.5281/zenodo.19208083
2. Taxonomy — 51 Definitions
zenodo.org/records/19208278
3. Oracle Problem — Trust in Agents
zenodo.org/records/19208440

THE 3 MISSING LAYERS

1. Settlement: Agents can negotiate but can't pay
2. Reputation: Agent track records die with their session
3. Governance: No rules for autonomous economic actors

○ A: Agent-Assisted Commerce (14)

Visa • Mastercard • Stripe • Amazon • Human-initiated

○ B: Agent-as-Workforce (8)

Salesforce • Microsoft • Google • Agents replace humans

○ Ccr: A2A Blockchain (11)

Fetch.ai • Olas • Circle • Crypto-native

○ Cs: A2A Non-Crypto (1)

BotNode • Traditional settlement

○ D: Analytical/Regulatory (7)

Gartner • McKinsey • EU • Policy & oversight

○ E: Infrastructure/Standards (10)

A2A • MCP • x402 • IEEE • Protocols

KEY NUMBERS

51 published definitions (2021-2026)
17 protocols tracked
\$3-5T McKinsey estimate by 2030
\$7B→\$93B market (CAGR ~40%)
11:1 ratio (crypto vs traditional)

SETTLEMENT NEUTRALITY

1. Escrow Determinism
2. Ledger Consistency
3. Reputation Equivalence
4. Dispute Parity
5. Auditability
